

PaxOcean

A member of the Kuok Group

About

PaxOcean

PaxOcean Group owns and operate shipyards in Singapore, China and Indonesia. The Group also operates a MRO (Maintenance, Repair & Operation) facilities in the Kingdom of Saudi Arabia. These shipyards and facilities offer comprehensive engineering services that support the complete life-cycle of maritime and offshore assets. Leveraging our core competencies and technical expertise, we provide an integrated suite of services encompassing newbuilding, module fabrication, conversion and retrofits, repairs and maintenance and green recycling.

VISION

We aspire to become a world-class service provider in the construction, conversion and repair of marine and offshore assets.

MISSION

We aim to develop a committed, competent and cohesive workforce, centred around our core values.

Health, Safety, Environmental and Quality

At PaxOcean, we prioritise exemplary Health, Safety, Environment and Quality (HSEQ) practices across all our business operations: Our commitment lies in executing projects with strict adherence to regulatory compliance, with the goal of minimising safety, health, and environmental risks. We foster a culture of safety consciousness through continuous training initiatives.

PaxOcean maintains a stringent quality assurance system to uphold our quality standards. We conduct regular audits and management reviews to ensure adherence to establish methodologies and to identify areas for process enhancements, thus delivering high-quality, value-added services.

At PaxOcean Group,

we are committed to leveraging our extensive engineering capabilities to develop transformative and sustainable solutions for the offshore and energy sectors. Our mission is clear: to enable our customers to thrive in the present while laying the foundation for a greener and brighter tomorrow. From conceptualization to construction, we are proud of our proven track record in delivering reliable and versatile solutions.

- Shipbuilding and Offshore Fabrication

- Decommissioning and Green Recycling
- Integrated Solutions

Shipbuilding and Offshore Fabrication

Our unique blend of holistic approach and specialized skills allows us to deliver innovative, premium solutions across all stages of a project life-cycle, from design and engineering to procurement, construction, and commissioning. Navigating complexities with precision, we provide tailored solutions that meet our clients' needs.

With precision engineering and state-of-the-art facilities, we specialize in fabricating complex structures tailored to offshore environments. Committed to quality and safety, we ensure that each project meets rigorous industry standards while maximizing efficiency and performance. We deliver innovative solutions that drive progress in offshore fabrication, empowering our clients to succeed in the dynamic and demanding marine environment.

Conversions and Retrofits

With a proven track record in delivering innovative and cost-effective services, our expertise ensures a seamless transition from concept to completion, adapting to the constantly evolving energy landscape through innovation. Whether it's repurposing existing vessels for new functions, enhancing efficiency, or meeting regulatory standards, we deliver tailored solutions to meet evolving demands.

We offer innovative ballast water treatment systems and SOx scrubber retrofit solutions, ensuring maritime compliance and environmental protection, while improving vessel operational efficiency.

Repairs and Maintenance

We position ourselves as a strategic partner, fostering collaborative relationships with our clients to manage a diverse portfolio of repair projects. Our highly qualified team prioritizes safety and operational excellence, ensuring the successful execution of all tasks, from routine maintenance to complex repair undertakings.

- LNG / LPG Carriers
- Crude Oil Tankers
- Container Carriers
- Offshore Support Vessels
- Dredgers
- Live-stock Carriers

Decommissioning and Green Recycling

At our ship recycling facility in Batam, we adhere strictly to the stringent standards outlined in the EU Ship Recycling Regulation. Through meticulous adherence to these regulations, we prioritize environmental responsibility, ensuring the safe and eco-friendly recycling of end-of-life vessels. Our commitment to upholding the highest standards underscores our dedication to fostering sustainable practices in ship recycling, safeguarding both the environment and surrounding communities.

Integrated Solution

We are committed to realizing low carbon energy transition solutions, driving sustainable value creation at every turn. By fostering strategic collaborations and partnerships across the industry, we recognise the potential to enhance value for end-customers by leveraging each other's capabilities. In pursuit of this goal, we are committed to exploring various alliances with trend-setters in the industry. These partnerships will enable us to capture greater value, driving innovation and delivering commercially viable solutions to meet the evolving needs of our customers.

Our Facilities

Our strategically located network of five shipyards optimizes vessel uptime for our shipowners. Leveraging key hubs across the region – Singapore, China , Indonesia (with 3 shipyards) – we offer a diverse range of services tailored to specific needs. This geographically advantageous footprint minimizes downtime associated with drydocking and repairs, ensuring our clients achieve optimal operational efficiency.

Situated in Saudi Arabia, our comprehensive Marine and Offshore (MRO) facility delivers a suite of customized maintenance, repair, and operational solutions. Our proficient operations team, coupled with an extensive spare parts inventory and a strategic focus on proactive inspections, ensures optimal asset performance throughout the lifecycle. This encompasses responsiveness to emergency situations as well as long-term strategic asset management plans.
